INSTRUCTOR: Barbara Neuhauser
415-338-1468
barbjn@sfsu.edu

E-MAIL CONTACT: You may e-mail me about administrative matters. Please do NOT e-mail questions about homework. I have to draw diagrams and wave my hands when I answer physics questions.

Please use this subject in your e-mail messages: "PHYSICS 320: your name"

OFFICE HOURS: MWF 2:30 pm – 3:30 pm in TH 540 (tentative)
Tuesday Noon – 2:00 pm in TH 106 (tentative)
and by appointment

PREREQUISITES: Physics 220 (Introductory Mechanics)
Physics 230 (Introductory Electricity and Magnetism)
Physics 240 (Introductory Optics and Thermodynamics)

REQUIRED TEXT: Quantum Physics of Atoms, Molecules, Solids, Nuclei, and Particles

RECOMMENDED TEXT: Physics: The Nature of Things

OBJECTIVES: Students are expected to master basic concepts in the following areas and to be able to apply them to solve qualitative and quantitative problems.

- Special relativity
- Evolution of quantum mechanical concepts
- Solution techniques for the 1-D Schroedinger equation
- Wave function of the hydrogen atom
- Orbital angular momentum and spin

LECTURES: Students are expected to attend ALL lectures and to ARRIVE ON TIME.
Please TURN OFF your cell phone during lectures. A tentative lecture schedule accompanies this syllabus. Lectures will discuss appropriate portions of the textbooks and provide extensive supplemental materials. Bound copies of the lecture notes will be available from PAC. Relevant questions that can be answered briefly are welcomed during the lectures. Longer discussions of topics must be deferred to scheduled office hours.

HOMEWORK: Problem sets will be assigned each Friday and will be due immediately after lecture on the following Friday. Students are expected to state briefly but clearly the justification for each major step in the solution to a problem. Sloppy homework sets may not be graded. Students may discuss with each other general approaches to the problems, but each student must work out the detailed solutions by him/herself. Each student who has turned in a problem set will be provided with a solution sheet attached to the graded problem set.

FAILURE TO HAND IN THE FIRST PROBLEM SET ON TIME MAY RESULT IN THE STUDENT BEING DROPPED FROM THE COURSE. Failure to hand in the remaining problem sets on time may result in a 25% penalty.
EXAMINATIONS:

QUIZZES: Approximately eight times during the semester a "take-home quiz" will be handed out during a lecture and will be due at the beginning of the following lecture. Each student should work out the detailed solutions by him/herself without discussing the quiz with anyone or using solutions obtained from any source.

MIDTERMS: (tentative) Friday, 17 October 2014; in-class, closed-book, closed-notes
(tentative) Wednesday, 19 November 2014; take-home, open-Physics 320 text, open-Physics 320 notes and problem set solutions

- The first midterm exam will be graded and returned for you to correct as an open-Physics 320 text, open-Physics 320 notes, do-it-yourself take-home exam.
- The reworked exam will then be graded, and the initial and final scores will be averaged.

FINAL EXAM: Wednesday, 17 December 2014, 8:00 am – 10:30 am

- The final exam MUST be taken at the scheduled time to avoid assignment of a grade of zero.
- Do NOT make travel plans that conflict with this schedule!
- No make-up final exam will be given except in the case of documented illness or personal crisis.

GRADE: A student must earn at least 50% of the total possible points in order to receive a grade of C-minus or better.

HOMEWORK: 35 % All homework sets will be included
QUIZZES: 15 % All quizzes will be included
MIDTERM EXAMS: 15 % each (Total 30 %)
FINAL EXAM: 20 %

CHEATING ON HOMEWORK, QUIZZES, OR EXAMS WILL RESULT IN FORMAL DISCIPLINARY ACTION BEING TAKEN AGAINST THE STUDENT.

LABORATORY: Students are expected to enroll in Physics 321 concurrently with Physics 320 unless an exception has been approved by the academic adviser. Physics 320 and 321 are graded separately.

STUDENTS WITH DISABILITIES: Students with disabilities who need reasonable accommodations are encouraged to contact the instructor. The Disability Programs and Resource Center (DPRC) is available to facilitate the reasonable accommodations process. The DPRC is located in the Student Services Building room 110 and can be reached by telephone (voice/TTY 415-338-2472) or by email (dprc@sfsu.edu).
Please fill out this form and hand it in at the beginning of the second lecture.
