Physics 112 Section 6  
Spring 2005  

Wednesdays 9:10 – 11:55

Tutor: KL Tah  
Office: TH 208  
E-mail: ktah@stars.sfsu.edu  
Web site: www.physics.sfsu.edu/~ktah/teaching.html  
Help Session: Wednesdays in TH231 from 12 pm (or a bit after since lab goes over sometimes) till 1 pm.

A word of warning: Do not lose this sheet of paper. On it contains some of the most important information you need if you are to make it through this course, such as my e-mail address and the course website. Protect it, cherish it as if it were your own –and keep it somewhere safe and accessible.

Weights:

- Punctual attendance – 40%
- Neat, concise, organized notebook keeping – 25%
- Final exam – 35%

Punctuality: is absolutely imperative, both for your health in general and in order to do well in the class. The moment you step in to lab, be prepared to go about your business in as efficient a manner as possible.

Absenties: If you cannot meet your regular lab section for some compelling reason, let me know via e-mail or at the lab the week before, failing which you risk invoking the wrath of the whole host of Mt. Olympus, not to mention that of your’s truly.
If you so desire, you may arrange a replacement lab with one of the other instructors for the full credit.

Be concise: Try to be brief and to the point in what you write and you do not have to copy whatever is in the lab manual into your notebook. The notebook is where you keep notes to yourself, so it doesn’t have to be absolutely perfect in form. Having said that, do make a sensible attempt at making it readable by someone other than yourself.
